The Institute for Wind Energy Systems invites applications for the position of a

**Research Assistant (m/f/d)**
**in Wind Energy/Aeroelastics**
**(Salary Scale 13 TV-L, 100 %)**

starting the next possible date. The position is initially limited to 1 year.

**Responsibilities and duties**
Responsibilities and duties include research and education. In research, the focus is aero-servo-elastic simulation and analysis of the aeroelastic stability of wind turbines. The research work is part of a coordinated research project with industry participation.

**Employment conditions**
To qualify for the position, applicants must hold a diploma or master’s degree in engineering with a strong relation to numerical methods and their application. Ideal candidates already have first experience and knowledge of wind energy technology and multi-body simulation of wind turbines. In addition, good programming skills, ideally in Matlab, are advantageous. We expect very good German and English skills, organizational aptitude, initiative, and the ability and willingness to familiarize with new areas and subjects.

The position is suitable for occupation by part-time workers, provided that it can be covered to the full extent.

As an equal opportunities employer, Leibniz University Hannover intends to promote women and men. For this reason, suitably qualified women are specifically invited to apply. Preference will be given to equally qualified applicants with disabilities.

For further information, please contact Dr. Claudio Balzani (phone: +49 511 762-5612, email: claudio.balzani@iwes.uni-hannover.de).

Please submit your application with supporting documents stating the **reference no.** 10/2020 by July 24th, 2020, in electronic form to the email-address given above or by ordinary mail to:
